Reasons For Allowance

None of the references disclose alone or in combination an optical fiber having a chromatic dispersion of –100 ps /nm/km wherein over the entire wavelength band except for the shortest and longest wavelengths thereof a chromatic dispersion defined by an orthogonal coordinate system of wavelength and chromatic dispersion value has a shape such that the chromatic dispersion values on the chromatic dispersion profile are respectively located on a minus side with respect to the associated chromatic dispersion values on a straight line connecting the chromatic dispersion values at the shortest and longest wavelengths.
